NEW YORK, November 81- Counterfeit \$50 egal tender notes are in circulation in this ity. They are a very close imitation of he genuine. Experts are being deceived between the notes apparent to the public. The last part of the engraving head of Hamperfect in the counterfeit. But in the is perfect in the counterfeit. But in the genuine the lines are across the point of the collar at the junction with the waistcoat. The other discrepancy is in the shape of the ornaments in the border on each end of the face of the bills and in the whole border on the back. The figures \$50 in the genuine bill is in an octagenal frame, rather well defined, though the angles are not sharp. Eight sides are easily discovered in the counterfeit in the border ernaments and are counterfeit in the border ernaments and are soften and only in a slight degree. It is thought the Treasury Department will call in all the \$50 legal tender notes in circula-
